Let's Hear It for Hearing!

Instructions: Ten containers each have different objects inside, and your job is to guess what's inside each container - using just your ears! Each container has a match, or another container with the same contents. Shake each of the containers, and use your sense of hearing to try to figure out what's inside. Can you find the containers that sound the same? Record which containers you think contain each item. Write the number that's on the bottom of each container on the correct line on the handout.

Item

Container 1

Container 2

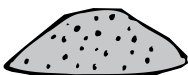

rice

beans

pennies

sand

cotton balls
