

## Strawberry Sorting

**Instructions:** Print or copy enough handouts so that you'll have a set of cards for each student who will be sorting at any one time. (Note: This activity may be most successful with only a few students at a time, instead of as an entire class activity.) Then, cut out each of the squares and give each set of cards to a student. Encourage students to group similar strawberries. Students can sort by number of seeds, number of leaves, or size. After students are finished sorting, encourage them to describe their method of sorting. Ask them to sort the cards again in a different way.
