

# Nemours CareConnect and School Clinic Support

*School-based telemedicine assists schools in keeping children healthy and in classrooms.*

Nemours CareConnect supports school medical care providers with on-demand care by a wide variety of pediatric specialists via high-quality online video and audio.

With the use of peripheral devices such as an electronic stethoscope and otoscope, your Nemours CareConnect physician can provide an additional level of care with a live examination, inviting the parent to the session and providing notes from the visit to the parent and the family's primary care physician. If needed, prescriptions will be sent electronically to the family's pharmacy of choice.

Nemours CareConnect extends the child's continuum of care with better and faster access, meeting children where they are – in schools.

With prompt, specialized care, children return to the classroom faster, and absenteeism is reduced for parents and siblings.

To learn how to connect your school clinic and student families to Nemours CareConnect, contact [NemoursCareConnect@Nemours.org](mailto:NemoursCareConnect@Nemours.org) or call (407) 567-4253.

Patient Satisfaction Rate

## Here's what they say about CareConnect:

*"With this technology, fewer parents have needed to leave work to take a sick child to the doctor. It has been enormously popular with our families."*

— Principal,  
Morning Star Catholic School

*"Nemours CareConnect made a stressful time so much easier. The doctor was wonderful and I think I had the same level of care we would have received in the office but with even greater convenience."*

— E. Wallner,  
Parent of CareConnect Patient

Your child. Our promise.
