

## Quiz Answer Key

1. Information you post about yourself online or via text messaging is your digital footprint.
2. When you post a photo online, it stays there:
  - a) 6 months
  - b) 1 year
  - c) until you take it down
  - d) possibly forever – other people could have copied it
3. List three ways to protect your computer from viruses:  
Install and frequently update anti-virus software; delete without opening emails with suspicious subject lines like “Funny Video!!” or “See these pics!!”; delete without opening email attachments from anyone you don’t know  
\_\_\_\_\_  
\_\_\_\_\_
4. True or false: When you’re on social networking sites, using the site’s default privacy settings is OK – you don’t need to make them more private.
5. Name five things about yourself that you should not share online:  
Any five of the following: full name, address, phone number, school name, age, birthday, location, email address, Social Security number
